

# Midterm Project 2019

*CSE 302 – Introduction to Web Design*

This semester's project will be a cumulative review of all of the things we have learned with HTML (with some CSS). Every web page should have its own unique theme. This is an opportunity for you to exercise your creativity and to promote something you really enjoy!

Our project structure will consist of:

- 1) Main Requirements (30 points)
- 2) Usability Requirements (30 points)
- 3) Content Requirements (40 points)
- 4) Peer Evaluation (50%)

\*\*\*100 points total of 50% from your teacher, another 50% will be from your peers – chosen randomly. This is as follows:

**100 points (teacher) – 50%**

**100 points (peer) – 50%**

## 3 phases:

### 1) Planning:

- a. Start time: **14<sup>th</sup>/15<sup>th</sup> Oct 2019**
- b. What is your theme for your webpage? What are you interested in?
- c. Does it have potential to include many HTML design elements?
- d. Can we use several images/text/videos to promote your idea?

### 2) Development:

- a. Start planning your website structure. How many pages will it have (minimum 5)
- b. Get feedback from 3 different people (2 friends + 1 teacher)

### 3) Submission:

- a. Due Date: **25<sup>th</sup>, October 2019 (during class)**
- b. Files will be submitted through GitHub (<https://github.com>) – please send this link your teacher.
- c. Peer review session
